

FLEX YOUR MUSCLES, BOOK YOUR PERSONAL TRAINER!

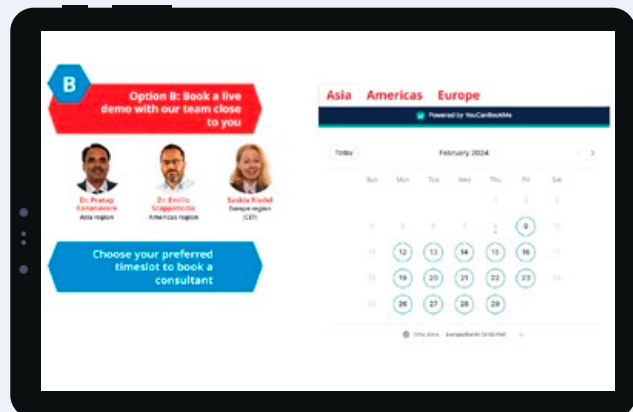

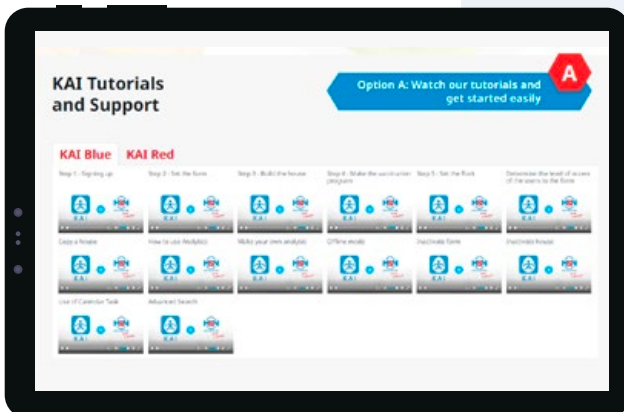

“ **KAI is the industries' cutting edge farming app – and it even comes with your own trainer!** ”

There are all sorts of reasons to not change to yet another App. You already have so many. You feel tied to one particular or obliged to use this one and no other or you are simply used to the one you had so far.

OK, but can YOUR App do this?

- **Offline data** up to 5 days?
- Create and export reports and **analysis directly** in the App?
- **Send automatic task-reminders?**

- Issue **warnings** to help you prevent mistakes?
- Create your **individual lighting-program** basing on your geo-locations?
- Is your app unbiased and offers to **monitor external breeds** as well?

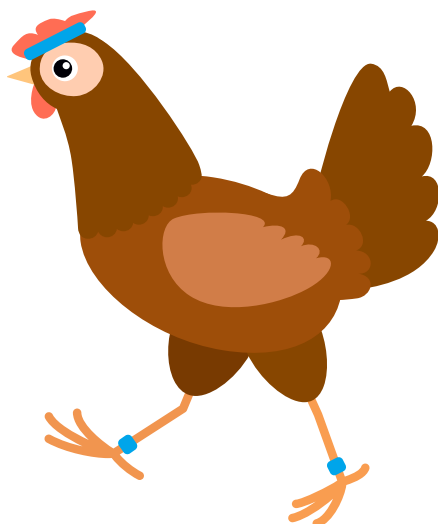

“ And finally – does your App come with free live demos and personal training?

Not that you need help, **KAI is professionally set up and made so simple and user friendly**, that you can start using it right away. It's self-explanatory – and offers in-system help via the little round symbols marked “i” for “information”.

Our tutorials take you through each cool function KAI offers

– simply copying house information, setting houses inactive or reactivate them by the click of one slider or planning your offline time ahead – you will find it all demoed in video.

But if you like a live demo from a real person in your time zone in Asia, the Americas or Europe – let's go, get it! Three personal trainers are available in English, Spanish, Italian, Hindi and German. Book your own trainer for free!
