

# 17-25 weeks

## Key issues at this stage

# Key points

- ✓ **Finish with highest feed intake possible at rearing.**
- ✓ **Same feed at arrival in production as in rearing.**
- ✓ **Use the Hybrid feed.**
- ✓ **Layer 1 should target feed intake at 30 weeks.**

# Hybrid feed

**High  
aminoacids**

**High  
calcium and  
phosphorus**

**Salt: 0.28%**

**Same low energy  
and high fibre as  
developer diet.**

**Coarse calcium  
carbonate 70%**

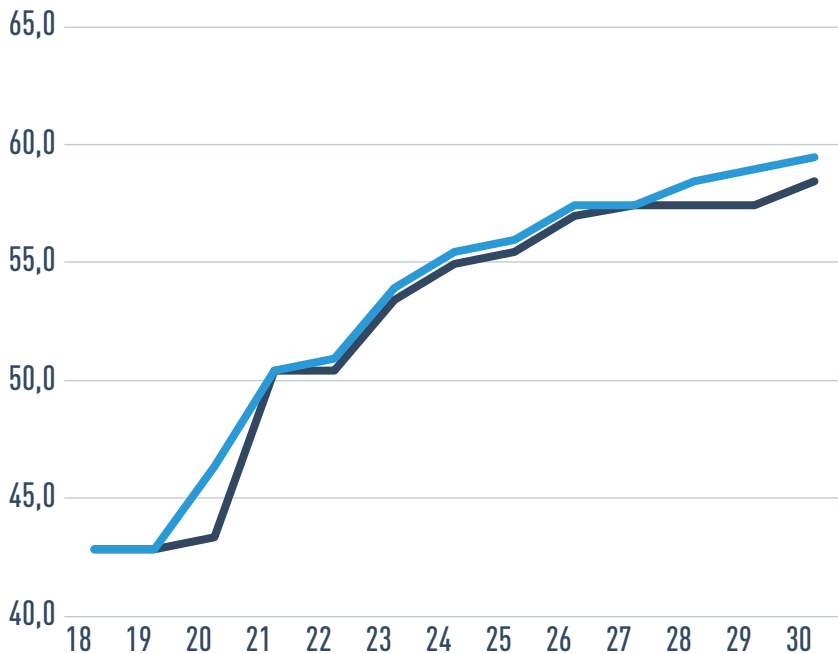

*\*See the nutrient recommendations  
at management guide*
